### 1 Planet 1 Ocean

[www.1planet1ocean.org/](http://www.1planet1ocean.org/)

1 Planet 1 Ocean is a new nonprofit organization founded to explore, restore and sustain the oceans through strong international partnerships, including the Gulf of Mexico and Cuba. In its first major project, the Living Gulf Project, 1Planet 1Ocean is working to make the Gulf of Mexico a model of sustainability and includes a project to explore and protect Cuba's Gulf of Mexico coast.

### Bridge: The Ocean Sciences Teacher Resource Center

[www.vims.edu/bridge/](http://www.vims.edu/bridge/)

This site is organized into five content-rich sections. "Ocean Science Topics" provides links to a variety of web sites related to ocean ecology, biology, chemistry, and more. The "Resource Pavilion" offers lesson plans, virtual expeditions, professional development opportunities, and student programs. Elementary teachers can find a collection of featured K-6 sites in the "Elementary Grades" section. The "Data Port" offers tips on current research and links to real-time data collection instruments. Finally, the "Communication" section includes links to educator discussion boards, frequently asked questions, and ask-an-oceanographer sites.

### Navy Oceanography Site

<http://www.onr.navy.mil/focus/ocean/>

Dive in to this online exploration of all areas of the ocean, including--to name just a few--waves and tides, oceanic habitats, and marine mammals. Interactive quizzes provide immediate feedback, and the Navy's CyberScientist is just a click away to help answer any additional questions.

### Ocean Literacy

<http://www.coexploration.org/oceanliteracy/>

Sponsored by NASA's Oceanography Program, this site provides information on ocean themes and issues related to the coastal environment and global climate change. Features project and activity listings, and database of research and classroom resources.

### Oceanus Magazine

<http://oceanusmag.whoi.edu/>

Oceanus is the oceanography magazine produced by Woods Hole Oceanographic Institution. It provides commentary on the meaning and value of ocean research, engineering, and education.
