Suggested Web Sites **RECYCLING**

Cleansweep USA

www.kab.org/kids/educators.htm

Keep America Beautiful offers six lessons for grades 4-8 on waste in the environment. The lessons focus on source reduction, recycling, composting, landfills, and waste to energy.

Energy and Recycling

<http://www.eia.doe.gov/kids/recycling/index.html>

This Department of Energy site explores the link between solid waste and energy, the history of garbage, how landfills work, and related topics. Biographies of pioneers in energy and "energy news you can use" are offered for students. Materials for teaching about energy are provided in Classroom Connection.

EPA Office of Solid Waste Educational Resources

www.epa.gov/epaoswer/education/index.htm

Teachers will find curriculum, activities, games, and other educational materials to teach students about waste generation and management. Student award and grant information is also provided, as well as information about environmental careers.

Waste free lunches

www.wastefreelunches.org/

This site aims to provide the information you need to participate in (or to start!) a waste-free lunch program at your school or place of employment.
