Wisconsin Center for Environmental Education

Our mission is to develop, disseminate, implement and evaluate environmental education programs for K-12 teachers and students. We work to improve environmental education.

NRES 340/540

Basic Concepts of Sustainability: Sustainability and Society

Citizens of a sustainable society can be defined as a people, regardless of geographical location, who believe in the care of nature to be as equal as the care of people to people. How do we go about accomplishing such a society built on cooperation and peace rather than confrontation, fear and war? In this course, we will explore just that, the importance, the why and how of a sustainable society. We will learn to work with nature rather than against it; approach problems in nature and turn them into solutions in nature; act and think globally and locally; establish a durable, waste-free resource base; and connect with like-minded individuals with the same ethical principles to form extended families that cross not only political boundaries but also cultural boundaries. Join us on this unique opportunity to act as a catalyst towards a sustainable future for us all. Mother Earth and your great-grandchildren will thank you!

Dates April 3 to 30, 2008

Instructor Mai Phillips
