

I am looking for a good device to monitor our cars amperage draw while driving, if anyone knows of something an could give me a lead it would be greatly appreciated. Also I would like to express my thanks to all of you who have helped me through with information. I think forum has been the difference for our successes so far this year

Thanks

Jason Faust

My digital amp meter came from northern arizona wind & sun Inc. 800 383-0195 or mike@wind-sun.com about \$50 with shipping. Stan

Our drivers seem to have trouble reading our numbers, about .5" tall. Maybe it is just our drivers! We have a Paneltronics meter coming to help with this problem.
