

I do not have any exact dates yet, but want to maybe get an idea of interested teams to collaborate with this year on travel and hotel costs.

Watertown's team plans to attend one of Iowa's events this year again. We attended Cedar Rapids - Hawk Eye Downs last year as a three day event for us and it was very "eye opening" as to what was possible with these cars! To watch a car go 40-45+ mph for an hour is pretty humbling! The Cedar Rapids event is historically Memorial Day Weekend. We drove down Thursday after school last year and stayed two nights in a cheap hotel 1/2 mile from the track. They had three heats between the two days, free tickets to the races Friday night and a lot of fun as usual! Track is a 1/2 mile oval. There was no registration fees other than registering your cars/team with Electrathon America. I think it is like \$25 per car. They do give out trophies to out of state entries.

If anyone else would be interested in traveling down with us this year, maybe splitting some travel costs with a bus if needed and bunking 4 kids to a room each to bring costs down, Let me know and we can continue discussions as time gets closer and information for their events are posted online.

We might be interested. Need dates though.

Iowa Electrathon Dates for Cedar Rapids - Hawk Eye Downs. May 23 & 24th.

We would leave Thursday after school as they start 8-9am on Friday the 23rd. Hotel is half mile from track with food in walking distance. last year we had free tickets to the Friday Night Stock Car races at the track.

Cost: register your team with Electrathon America and there was no cost last year. \$30 for first car and \$15 each additional car. If you car fits the Wisconsin Electrathon rules, it will comply with Iowa, exception of class 3 using more batteries though... They do open up the camping field at the track if anyone wants to camp, but we do not for safety concerns. Hotel is cheap and worthy.

We would return late Saturday. Teams get in three heats at Hawk Eye Downs. Friday has one heat for Electrathon America Standings which we can run in and get awards for, and Saturday has two Iowa Electrathon heats which we can run in and get awards for. (Good luck winning endurance) Track is 1/2 mile oval with decent banks. Pits on inside loop. was about 11 cars last year in attendance. no speed limits. Drag races on Saturday after last heat.

Watertown would LOVE to have more Wisconsin Teams joining us for this event. There is a lot to get from their event and to see a different level of competition is great as well! If interested, we can help you with finding paperwork for event.

Let us know.
