

A drawing(s) showing roll bar/roll cage dimensional requirements would be nice.

Car ID's ... can class and car number be @8" tall and WI smaller?

I didn't get specific numbers but there were more than a few cars with numbers smaller than 8". It made it difficult at time to count laps.

The J-Hudson battery charging method increased battery output performance from 23885 Watt-Minutes to 27250 Watt-Minutes or roughly 4.8 amps for one hour.
