

What is the most valuable tool or tools to have in the Electrathon tool box? I am getting a grant proposal together and am looking at lots of different types of tools and equipment. What are the bare bones for any Electrathon team to have? What do you use the most? Are there certain tools you should spend more on? Get the highest quality because you use them so often, or with the kids just get the basics? What does the dream Electrathon shop have?

Thanks,

Jon Kollath
