

Basic Skills Testing (For 449)
Review Materials For Questions
Relating to Forestry 425

Students wishing to review for the Basic Skills Testing are directed to the following materials. While, mastery of any one of these three sets of material should provide a sufficient base of information to allow the student to pass the portion of the test containing questions relating to Forest Management and Finance, Forestry 425; I believe the first is the most appropriate for the level of questions that may be included. Note that questions on the basic skills test will not cover the full range of material in For 425, but instead will be focused on the more basic concepts.

1. Introduction to Forest Resource Management by William A. Leuschner -- 3 copies on reserve in the Library under Forestry 449.

Chapter 4. -- The Time Value of Money and Compound Interest.

Chapter 5. -- Decision Criteria.

Chapter 10. -- Introduction to Forest Regulation.

Chapter 11. -- Regulating Even-Aged Forests.

Chapter 13. -- Rotation Determination.

Chapter 14. -- Calculating Allowable Cut.
2. Forest Resource Economics And Finance by W. David Klemperer -- the text for Forest Management and Finance, For 425.

Chapter 4. -- The Forest as Capital.

Chapter 5. -- Inflation and Forest Investment Analysis.

Chapter 6. -- Capital Budgeting in Forestry.

Chapter 7. -- Economics of Forestland Use and Even-Aged Rotations.
3. The student's notes, homework, quizzes, and exams from Forest Management and Finance. In addition to the student's own file, there is a set of tests from the Forestry 425 class (not the basic skills test) on reserve in the Library under For 425.
