

Name: _____

Instructor: _____

Video Assignment:
Glaciers
Earth Revealed series
(Annenberg/CPB)

1. Describe the process that creates glacier ice.
2. Describe how a glacier moves and the variation in ice velocity through the ice mass.
3. What is the snow line and how does its position reflect glacier mass balance?
4. Describe the orbital explanation for the onset of ice ages.
5. How do glacier ice cores help our understanding of climate change?
