

IV CURRICULAR GUIDELINES AND CHECKLISTS

The UWSP Department of Music offers a number of Bachelor of Music degrees, a Bachelor of Arts degree and a Music Minor.

Students seeking teacher certification in either choral or general music should complete BOTH tracks.

The General Degree Requirements (GDR) and music degree checklists on the following pages include all of the requirements for each music degree track. They are there to help you. Use them to keep track of your progress towards completing your degree.

A. MUSIC MINOR

Admission to the music minor is by audition.

A minor in music consists of 24 credits as follows:

1. Musicianship, 8 cr.: Music 110, 111, 112, 113. (Placement examination required; students with insufficient background must take Music 109 as a prerequisite to Music 110.)
2. Applied lessons, 4 cr.: Music 160-181. (2 cr. per semester)
3. Large Ensemble, 2 semesters, 2-4 cr.: Music 144, 341, 342, 343, 345. (2 cr. per semester Except if placed into Mus 144, which is a 1 cr. Course).
4. Music Electives, 8 cr., selected from at least two of the following groups: (Note: Music 100-105, 109, Music Ed. 201 and 381 do not count toward the music minor.)
 - a. Theory/Composition courses, except Music 109
 - b. Conducting courses
 - c. Music History & Literature courses at the 200 level and above
 - d. Music Education courses, except as noted above
 - e. Small or Large Ensembles
 - f. Applied Music
 - g. Instrumental Methods and group piano
 - h. Jazz Studies courses in Performance, History, or Analysis
5. Recital attendance requirement, 0 cr.: Music minors must attend 15 recitals or concerts each semester of their required applied study. This requirement is administered by their applied teacher.

Students interested in the music minor should contact the music minor advisor regarding their musical objectives and music electives. Declared music minors should contact their assigned music advisor for authorization to register for PR music courses.

B. MUSIC MAJOR SCHEDULING GUIDELINES

1. MUSIC PROFICIENCIES
 - a. PIANO PROFICIENCY. Every music major must demonstrate a piano proficiency of 100 Level or higher, depending on the major instrument and the degree sought, in order to graduate. Since this is a proficiency requirement rather than a course requirement, students whose main instrument is not piano and who enter UWSP with sufficient piano skills to pass the proficiency test appropriate to their degree need not take any credits of piano. Most students, however, need to take from one to three semesters of class piano, 2 credits per semester, to achieve the required proficiency level. It is important to begin taking the necessary class piano courses in the first semester of the freshman year unless a student places into Music 109 as a result of the music theory diagnostic test. Completion of Music 109 or placement into Music 110 are prerequisites for class piano.
 - b. MUSIC TECHNOLOGY PROFICIENCIES. Every music major must complete the Music Technology Proficiencies in order to graduate. This requirement consists of receiving training in the use of the equipment and software available in the Computer Music Center. This training is

included in the freshman musicianship curriculum. Once the training is completed the requirement has been fulfilled.

- c. MUSIC THEORY PROFICIENCIES. Every music major must complete the Music Theory Proficiencies in order to graduate. This requirement is fulfilled upon satisfactory completion of Music 210 and Music 212.

2. GENERAL DEGREE REQUIREMENTS GUIDELINES

- a. MATH PLACEMENT. If you have not taken the math placement exam, take it NOW. Contact the math department for an appointment.
- b. NATURAL SCIENCE - 6 credits minimum. This MUST be two lab courses, one each in two different disciplines. Astronomy 311 does NOT count. For teacher certification, one lab course in physical science and one in life science are required. Music majors are encouraged to take Physics 115, The Physics of Sound, as their physical science course.
- c. HISTORY - 6 credits total. A two course sequence is required for the Bachelor of Arts degree. Music education majors MUST take History 176 and 177.
- d. HUMANITIES/SOCIAL SCIENCE - 18 credits total. To reduce credits to degree, music majors should take 12 credits in the humanities, of which six will be fulfilled by required music literature courses, and 6 credits in the social sciences (Psychology 110 and Political Science 101 fulfill this requirement and are required for teacher certification.).
- e. WRITING EMPHASIS(WE), MINORITY STUDIES(MNS) and ENVIRONMENTAL LITERACY(EL). Select GDRs with these requirements in mind in order to avoid having to take extra courses to fulfill them.

WE: 6 credits required. WE courses cannot be taken until the required freshman English courses have been completed. A couple of upper level music theory courses are offered as WE courses, so part of this requirement can be fulfilled by taking them.

MNS: The Jazz History course, Music 305, fulfills both the MNS GDR requirement and the American music requirement for certification in General Music.

EL: Geography 100 fulfills both a physical science lab course GDR requirement and the EL requirement. If Music Education majors take Physics 115 for their physical science requirement, either Philosophy 380, Environmental Ethics, or English 392, Literature and Ecology, may be taken to fulfill both the EL and the appropriate GDR content area requirements.

- f. NON-WESTERN CULTURE(NW). This requirement is fulfilled by Music 220, Introduction to Music Literature; therefore, music majors need not take a GDR to fulfill this requirement.

3. MISCELLANEOUS CONSIDERATIONS

- a. CREDIT LOAD. Enrollment in 18 or more credits requires special authorization. The Department Chair must authorize a credit load of 18-20 credits. The Dean of the college must authorize 21 credits or more. EXCEPTION: Enrollment 18 credits including one required wellness credit does not require special authorization.
- b. SPECIAL WORK, INDEPENDENT STUDY COURSES and THESIS COURSES require the written permission of the instructor and the Department Chair. Special Authorizations forms for this purpose are available in the department office and the Office of Records and Registration.
- c. **PLAN AHEAD!!!** The **Staggered Class Plan** on page 21 will help you fit required music courses into your schedule when they are offered. Many students have gotten caught with a scheduling conflict between two required courses in what should have been their last semester, and have ended up spending an unnecessary extra semester at UWSP. Such problems can be avoided if you **PLAN AHEAD!!!**

C. GENERAL DEGREE REQUIREMENTS (GDRs)

1. To fulfill these requirements, courses must be selected from the approved lists, which can be found online by going to: [myPoint-Academics-Academic Toolbox-Course Catalog-Degree Requirements](#) (which takes you to a page titled "General Degree Requirements"). Then scroll down to the second place where the heading "General Degree Requirements" appears in large, purple letters and click on the link to your degree.
2. **REMEDIAL COURSES:** Students who place into remedial math and/or English courses are to restrict their credit loads to a level that will allow for success.
3. Students must receive written permission from their advisor to enroll in more than 16 credits during any semester in which remedial math or English courses are taken. Students desiring to enroll in more than 18 credits of instruction during any semester in which remedial math or English courses are taken must receive written permission from the Dean of their College. Factors to be considered in making a decision on credit load should include the ACT score, high school class rank, overall high school record, university GPA, the time demands of the course work in which the student is enrolled, extracurricular activities, employment, etc., and stress resulting from illness and/or personal or family difficulties.
4. Freshmen who place into remedial math and/or English are required to complete the remedial course work prior to earning 30 credits toward graduation. If they fail to complete the remedial course work prior to earning 30 credits they will be restricted to a maximum of 12 credits per semester, including the remedial courses, until the remedial courses are successfully completed.
