

Physics 115 Lecture 12

Catch up and review

February 16, 2018

1

About the exam

- I will provide the equations (no need to memorize them) and any constants (like density, air pressure, etc.) you may need
- Five numerical problems worth 35 points. Write symbolic formula, show steps leading to answer, present answer with units for full credit
- Ten true/false questions worth 20 points
- Fifteen multiple-choice questions worth 45 points. A few of these may require a simple calculation or ratio

Review
