Wisconsin K-12 Energy Education Program 15-Year Report

“More than ever, energy and environmental issues continue to grab headlines and impact our everyday lives. Energy education is the key to search energy policy and issues, the help guide new and emerging technologies, maintaining a high level of environmental protection and creating a strong economy.”

**Keep** is an important component of the Wisconsin Department of Public Service, and students have learned about energy and have become active in energy conservation. The support services and materials that are available for teachers can continue to count on KEEP to help them improve and increase energy education in their classroom.

**To further illustrate KEEP’s accomplishments, the table “KEEP by the Numbers” enumerates ways teachers and students have learned about energy and have become active in energy conservation.**

**Proven Development:** KEEP courses and educational experiences motivate teachers to integrate important energy concepts into their curriculum.

**Resources:** From the comprehensive activities guide to KEEP’s resource lending library, teachers have many strategies to build students’ awareness of energy topics and to provide experiences in energy management.

**Funding Opportunities:** KEEP partners with stakeholders to help teachers identify and secure funds they need to increase and improve energy education in their classroom.
