Exam II
4. Two-Dimensional Kinematics, 82
   4-1. Motion in Two Dimensions, 83
   4-2. Projectile Motion: Basic Equations, 86
   4-3. Zero Launch Angle, 88
   4-4. General Launch Angle, 92
   4-5. Projectile Motion: Key Characteristics, 96

5. Newton’s Laws of Motion, 111
   5-1. Force and Mass, 112
   5-2. Newton’s First Law of Motion, 112
   5-3. Newton’s Second Law of Motion, 114
   5-4. Newton’s Third Law of Motion, 122
   5-5. The Vector Nature of Forces: Forces in Two Dimensions, 125
   5-6. Weight, 128
   5-7. Normal Forces, 132 [You should understand normal forces, and we use them all the time in free body diagrams, but I didn’t assign any homework questions specifically from this section.]

6. Applications of Newton’s Laws, 147
   6-1. Frictional Forces, 148
   6-2. Strings and Springs, 156 [Our Newton’s Second Law lab (sled dragging on track) used these concepts, but I didn’t assign any homework questions specifically from this section.]
   6-3. Translational Equilibrium, 161 [Skipped for now, we return to these concepts in Chapter 11]
   6-4. Connected Objects, 165
   6-5. Circular Motion, 169
   Physics in Perspective: Force, Acceleration, and Motion, 188

7. Work and Kinetic Energy, 190
   7-1. Work Done by a Constant Force, 191
   7-2. Kinetic Energy and the Work-Energy Theorem, 197
   7-3. Work Done by a Variable Force, 202
   7-4. Power, 206
   8-1. Conservative and Nonconservative Forces, 217
   8-2. Potential Energy and the Work Done by Conservative Forces, 221
   8-4. Work Done by Nonconservative Forces, 234
   8-5. Potential Energy Curves and Equipotentials, 239

  Physics in Perspective: Energy: A Breakthrough in Physics, 252

9. Linear Momentum and Collisions, 254
   9-1. Linear Momentum, 255
   9-2. Momentum and Newton’s Second Law, 257
   9-3. Impulse, 258
   9-4. Conservation of Linear Momentum, 262
   9-5. Inelastic Collisions, 267
   9-6. Elastic Collisions, 272 (but not Elastic Collisions in Two Dimensions)
   9-7. Center of Mass, 278 (but not Motion of the Center of Mass)

*9-8. Systems with Changing Mass: Rocket Propulsion, 284
